

2018 Non-EGL UC Resources for Genetic Research

UC Berkeley resources:

MCB storerooms: Lab reagents and consumables. Excellent for special orders and items not regularly kept in stock in the EGL. Their websites are well-maintained and can be used to see what items are currently available and to make special order requests. An [account](#) grants you access to both storerooms.

177 [LSA](#): <http://mcb.berkeley.edu/lisa/storeroom/>

Open 8:45am-4:45pm Mon-Fri

Contact: Fred Khorshidi

E-mail: lsastockroom@mcb.berkeley.edu

Phone: 510-643-8998 or 510-643-9508

1 [Barker Hall](#): <http://mcb.berkeley.edu/barker/storeroom/>

Open 8am-noon & 1-5pm Mon-Fri

E-mail: bkstockroom@mcb.berkeley.edu

Phone: 510-642-1095 or 510-642-6739

QB3 (California Institute for Quantitative Biosciences) core facilities: sample preparation and assessment, library preparation, high throughput sequencing (HiSeq, PacBio), computational resources

[Vincent J. Coates Genomics Sequencing Laboratory](#): Illumina & PacBio Sequel sequencing and some library prep and QC services. [Spring 2018 rates here](#). Samples can be dropped off here for sequencing or the the Functional Genomics Lab. They maintain a [page with the current Illumina queue and calendar of scheduled runs](#) for QB3.

B206 [Stanley Hall](#)

Open: 10a-5p

Contact: Shana McDevitt

E.mail: shana.mcdevitt@berkeley.edu

Phone: 666-3372

***request to be subscribed to their user list by [emailing gslusers-owner@lists.berkeley.edu](mailto:emailing_gslusers-owner@lists.berkeley.edu).

[Functional Genomics Lab](#): Smaller scale [bioanalyzer runs](#), Covaris DNA shearing, Pippin Prep, and [much more](#). Some instruments (like the bioanalyzer) are run by facility staff, but for others, they will train you and charge an hourly or per-use fee.

255 [LSA](#)

Open: 10a-5p, but often they are there later in the afternoon as well.

Contact: Justin Choi and Karen Lundy

E.mails: jychoi@berkeley.edu, lundyk@berkeley.edu

Phone: 642-1165

[Computational Genomics Resource Laboratory](#) (CGRL): seminar series, data analysis workshops, cluster access/consultation. I recommend joining their mailing list to keep up with announcements that may be of interest.

238 [Koshland Hall](#)

Contact:

Ke Bi, Bioinformatics Scientist

E-mail: kebi@berkeley.edu

[MCB DNA Sequencing Facility](#): Sanger sequencing at reasonable [rates](#) starting from cleaned PCR products. [Sample/primer mixtures](#) can be dropped off in 136 [Life Sciences Addition](#) (first floor cold room) by 11:30am (the sample racks are rear left on the shelf below the bench) or dropped off at their Barker Hall location in the afternoon.

310 [Barker Hall](#)

2018 Non-EGL UC Resources for Genetic Research

Open: 9a-8p

Contact: Hitomi Asahara and Brian McCarthy

E-mails: hitomi@berkeley.edu, brianmcc@berkeley.edu, dnaseq@berkeley.edu

Phone: 642-6383 or 642-9601

[Electron Microscope Lab at UC Berkeley](#): Liquid Nitrogen. Sign up with [this form](#) (mention in the comments if you only wish to use the liquid nitrogen in order to expedite the process.)
26 [Giannini Hall](#) (Note: the lab is in the northwest corner of the building, on the same side as the parking lot.)

Contact: Kent McDonald

E-mails: klm@berkeley.edu

Phone: 642-2085

Off-campus resources:

UC Davis Genome Center [DNA Technologies Core Facility](#): Good reasonably local source for PacBio HT runs and 10x Chromium library preps. [Current rates here](#). UC Berkeley customers pay the same as internal customers. They also offer large-scale (Illumina Infinium II) and medium-scale (Fluidigm EP1) genotyping assays.

[UCSF Center for Advanced Technology](#) has a NovaSeq running the S4 flowcell (~750M reads per lane) with PE150. Contact eric.chow@ucsf.edu for information on rates and submission details.
